# General Information

## Location

Oriental Mindoro is located in MIMAROPA Region. It lies 45 kilometers south of Batangas and 130 kilometers south of Manila.

## Topography

Oriental Mindoro has a rugged terrain and an irregular coastline. Numerous rivers and streams traverse the province but none are navigable by large vessels.

## Land Area

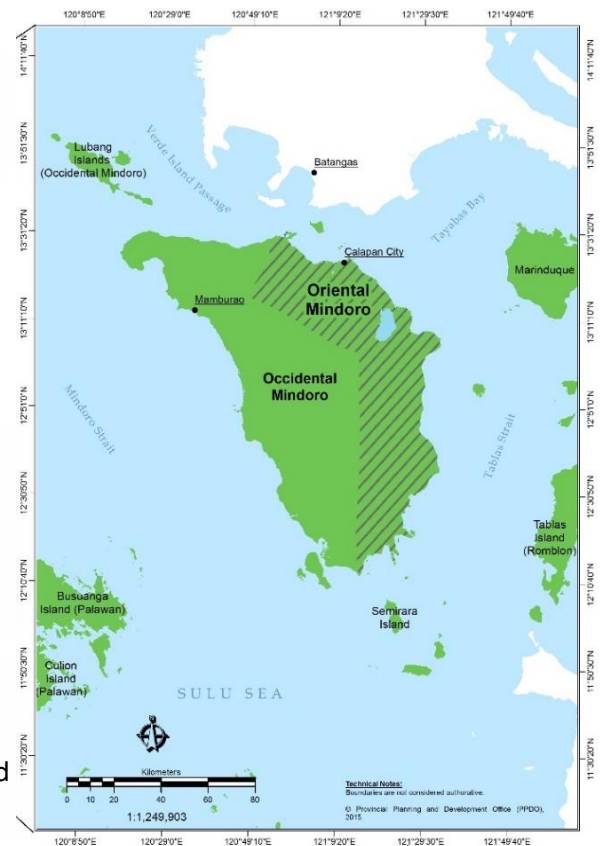

Oriental Mindoro has a total land area of 4,364.72 square kilometers or 436,472 hectares. It represents 1.5 percent of the total land area of the country and 16 percent of the MIMAROPA Region.

## Boundary

It is bounded by Verde Island Passage on the North; Maestro del Campo Island and Tablas Strait on the East; Semirara Island on the South; and Occidental Mindoro on the West.

## Climate

The province has two climate types: Type I and Type III. Type I is characterized by two pronounced seasons, dry and wet. Type III has no pronounced season, relatively dry from November to April and wet during the rest of the year.

**Capital**  
Calapan City

**Date of Approval**  
November 15, 1950

**Legal Basis**  
RA 505 (Division of Mindoro)

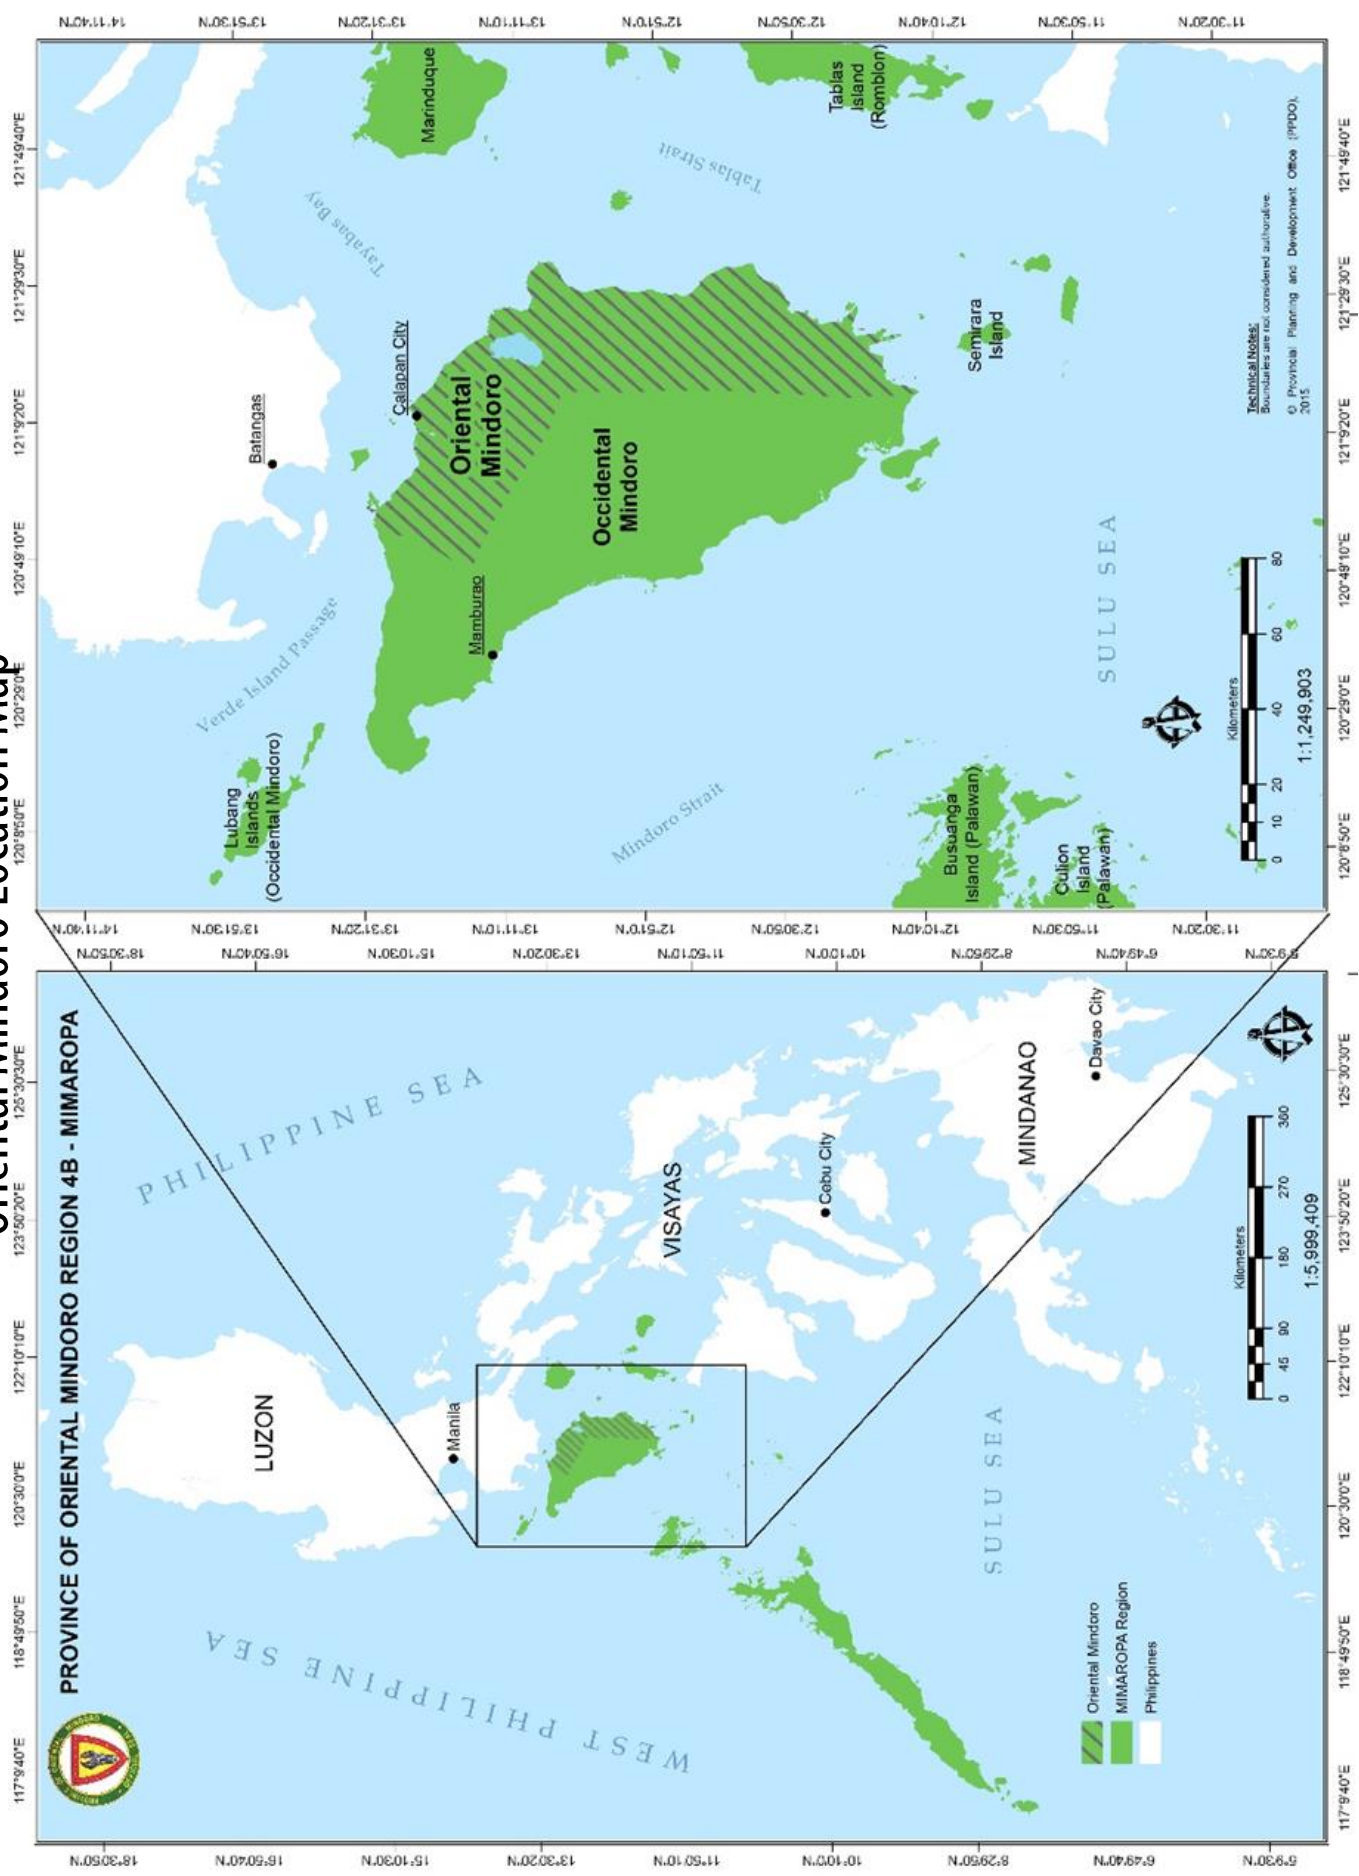

**One Component City**

**14 Municipalities**

**Two Congressional Districts**

**426 Barangays**

**A MINERAL RESOURCE** is a concentration or occurrence of material of intrinsic economic interest in or on the earth's crust in such form, quality and quantity that there are reasonable prospects for eventual economic extraction.

**NONMETALLIC MINERAL PRODUCTS** are a special group of chemical elements from which no new product can be generated if they are melted. Nonmetallic minerals are, for example, sand, gravel, limestone, clay and marble.

## FOREST COVER

Forest Cover of MIMAROPA (By Province, Area in Hectares) December 31, 2010

Province	Closed Forest	Open Forest	Mangrove	Total Forest
Marinduque	-	12,255	2,877	15,132
Occidental Mindoro	1,968	101,424	1,594	104,986
<b>Oriental Mindoro</b>	<b>5,301</b>	<b>77,731</b>	<b>3,949</b>	<b>86,981</b>
Palawan	86,877	541,590	63,821	692,288
Romblon	3,664	11,529	1,084	16,277
<b>MIMAROPA</b>	<b>97,810</b>	<b>744,530</b>	<b>73,324</b>	<b>915,664</b>

<http://forestry.denr.gov.ph/index.php/forest-cover-region4b>

Forests can be '**CLOSED**' or '**OPEN**' depending on the amount of cover provided by the tree canopy over the forest floor. An example of a closed forest is a rainforest, where branches and foliage of trees meet. Woodlands have a more open canopy with trees spaced farther apart.

Classification	Beneficial Use
<b>Class AA</b>	<i>Public Water Supply Class I.</i> This class is intended primarily for waters having watersheds which are uninhabited and otherwise protected and which require only approved disinfection in order to meet the National Standards for Drinking Water (NSDW) of the Philippines.
<b>Class A</b>	<i>Public Water Supply Class II.</i> For sources of water supply that will require complete treatment (coagulation, sedimentation, filtration and disinfection) in order to meet the NSDW.
<b>Class B</b>	<i>Recreational Water Class I.</i> For primary contact recreation such as bathing, swimming, skin diving, etc. (particularly those designated for tourism purposes).
<b>Class C</b>	1) Fishery Water for the propagation and growth of fish and other aquatic resources; 2) <i>Recreational Water Class II</i> (Boatings, etc.) 3) Industrial Water Supply Class I (For manufacturing processes after treatment).
<b>Class D</b>	1) For agriculture, irrigation, livestock watering, etc. 2) <i>Industrial Water Supply Class II</i> (e.g. cooling, etc.) 3) Other inland waters, by their quality, belong to this classification.

💡

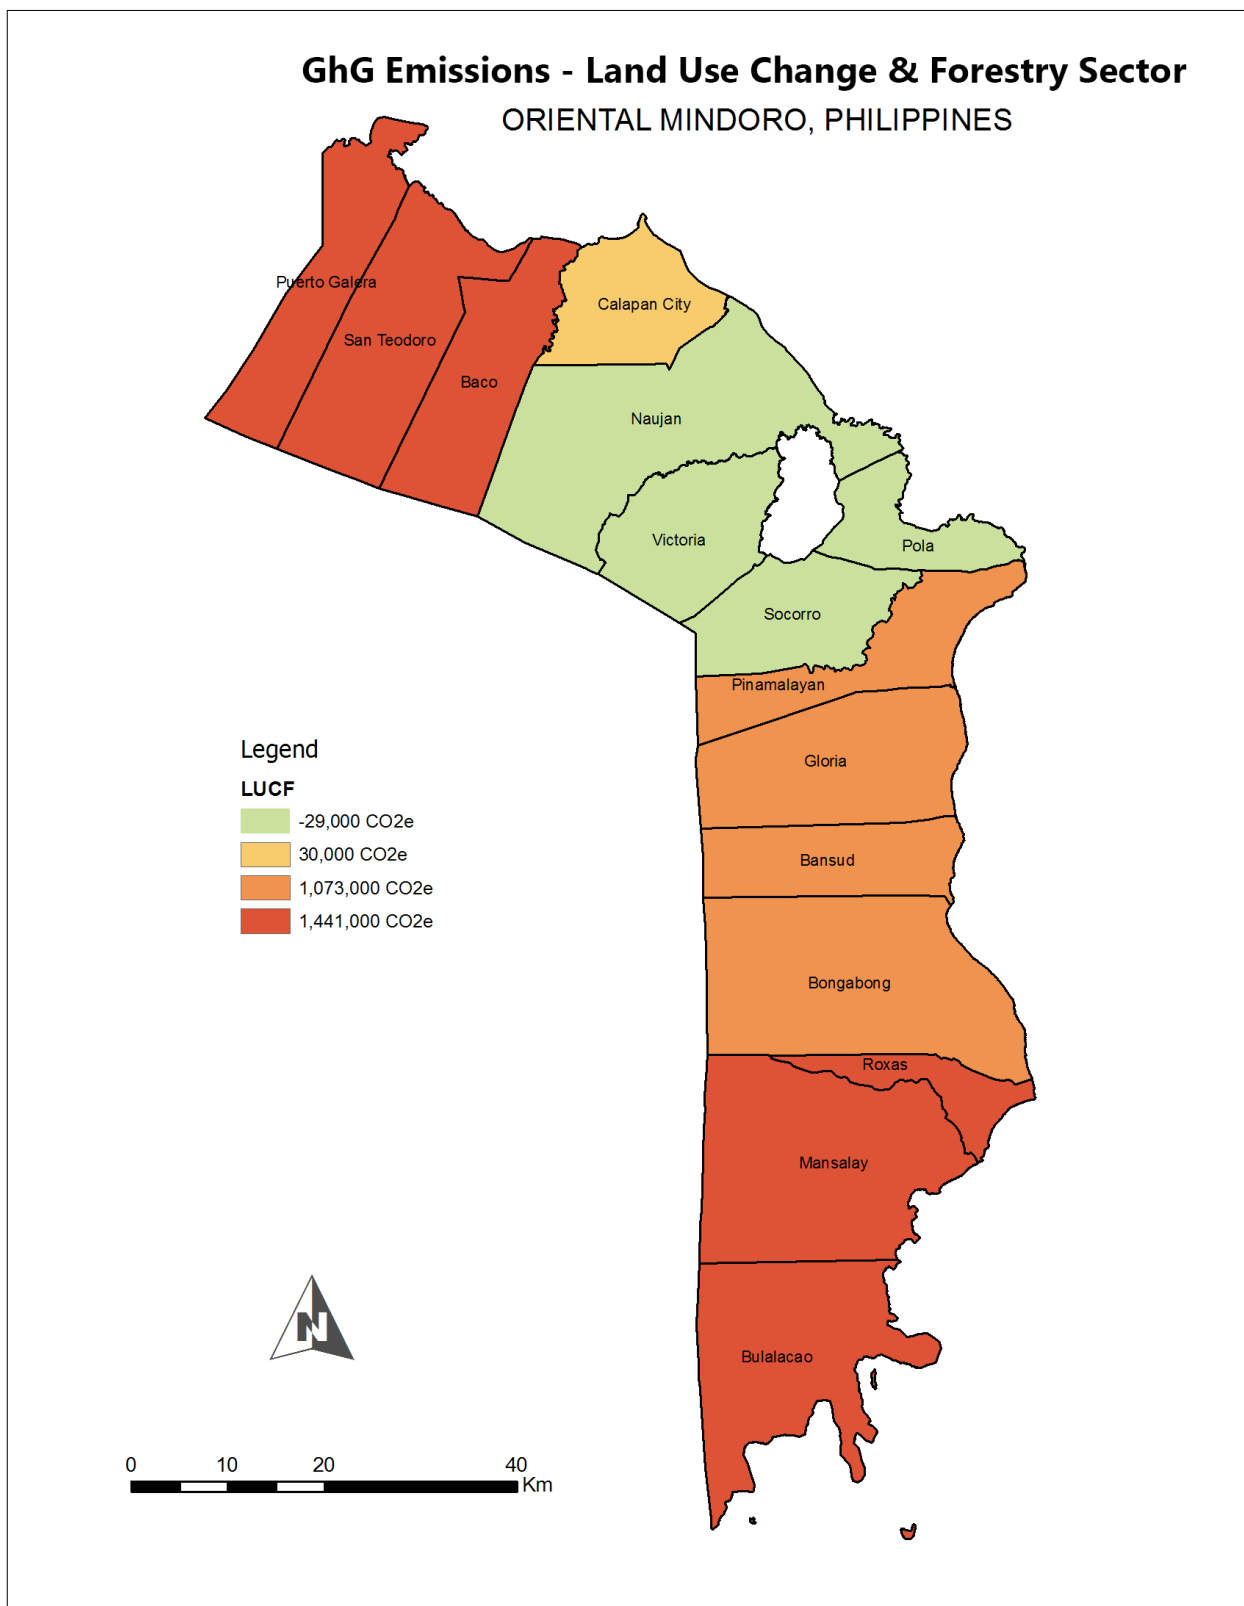

### GREENHOUSE GAS

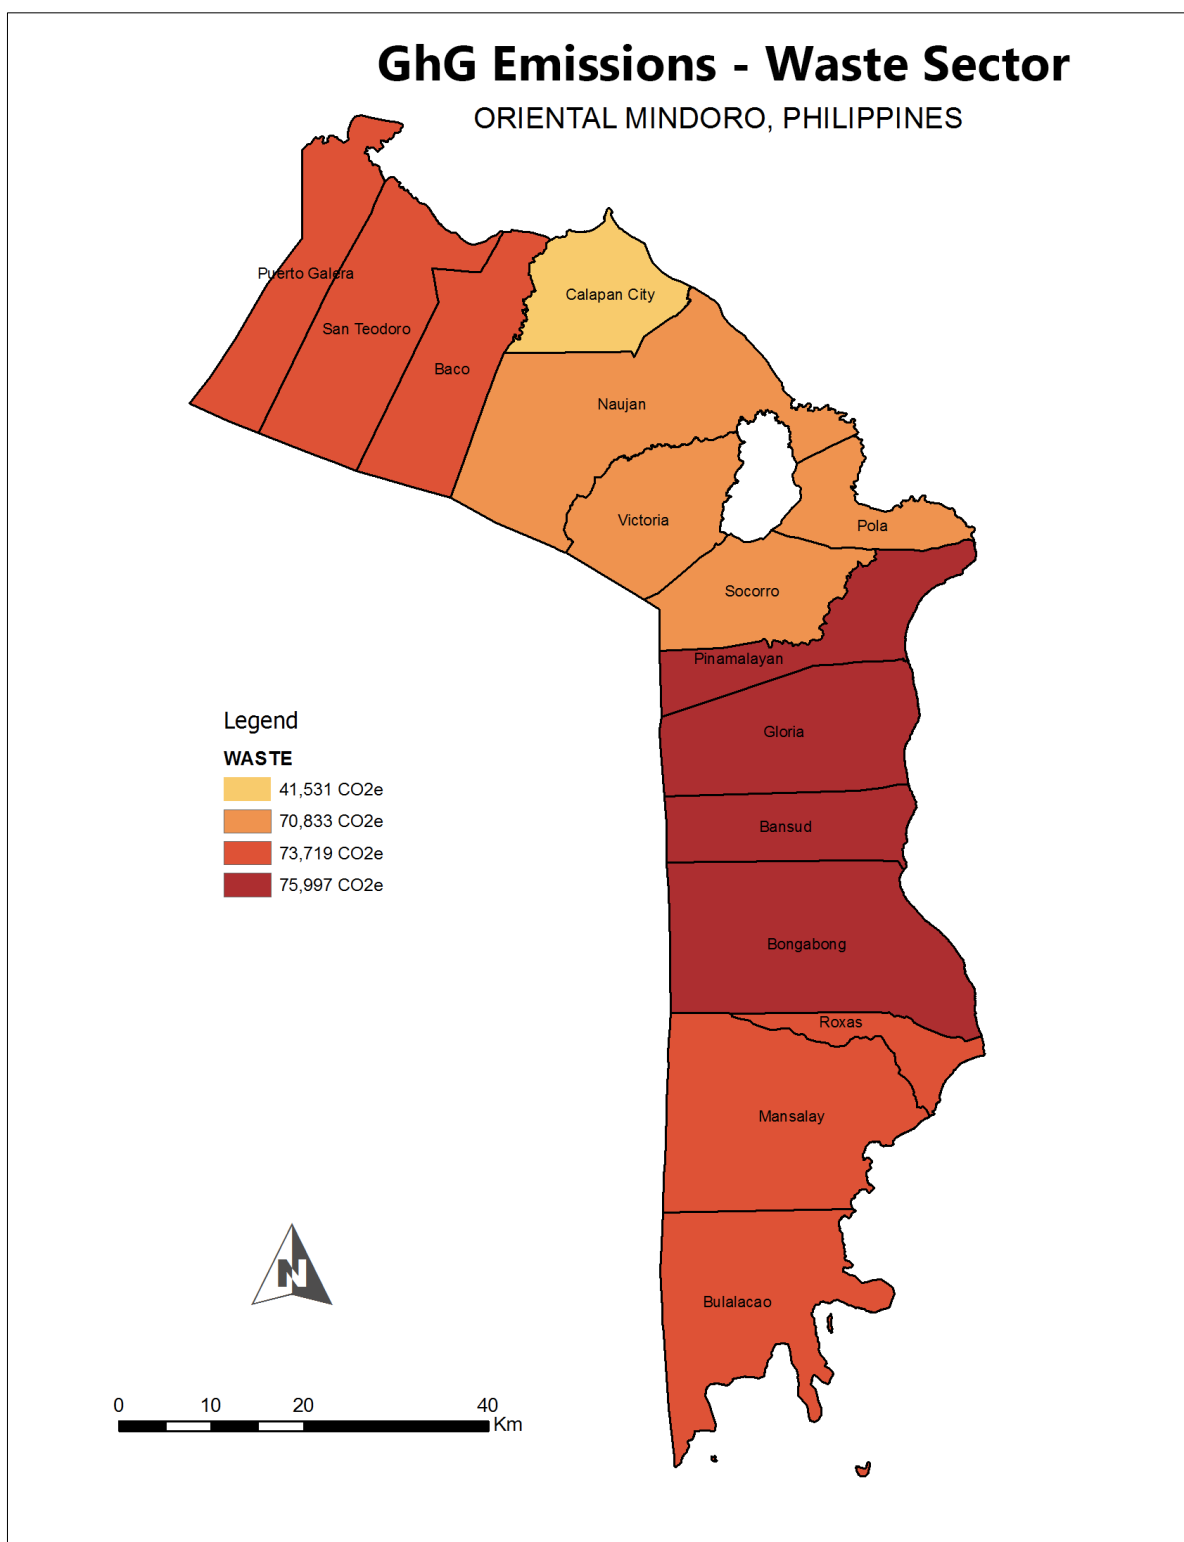

A greenhouse gas (GhG) is a gas in an atmosphere that absorbs and emits radiant energy within the thermal infrared range. This process is the fundamental cause of the greenhouse effect. The primary greenhouse gases in Earth's atmosphere are water vapor, carbon dioxide, methane, nitrous oxide, and ozone. Without greenhouse gases, the average temperature of Earth's surface would be about -18 °C (0 °F), rather than the present average of 15 °C (59 °F). -

## GhG Emissions - Transportation Sector

ORIENTAL MINDORO, PHILIPPINES

## COASTAL RESOURCES

### Major Species Commonly Caught

- Tanigue, tambakol, malasugi, mamsa, lapu-lapu, galunggong, tuna, herrings, hasa-hasa, kalapato, caranx, dalagang-bukid, alumahan, bisugo, samaral, anchovies, sardines

### Minor Species other than Fish

- Squid, shrimp, prawn, octopus, mudcrab, shells, lobster, cuttlefish, mussel, oyster, blue crabs, seaweed and sea cucumber

### GROWTH RATE -

indicates how fast a population increases or decreases as a result of the interplay of births, deaths, and migration during a given period of time.

## Annual Population Growth Rate, by City/Municipality, 2010-2015

## Life Expectancy at Birth

2000 Census-Based National, Regional and Provincial Population Projections  
Source: PSA Quickstat, December 2017

**LIFE EXPECTANCY AT BIRTH** - reflects the overall mortality level of a population. It summarizes the mortality pattern that prevails across all age groups - children and adolescents, adults and the elderly. It is the average number of years that a newborn is expected to live if current mortality rates continue to apply.

## 2015 Population Density, Oriental Mindoro

## Seven Mangyan Tribes

The name Alangan was derived from the name of a river and mountain slopes in the upper Alangan Valley [Leykamm, 1979].

an Heritage Center

The women traditionally wear a skirt called *linge*. This is made of long strips of woven nito (forest vines), and is wound around the abdomen. This is worn together with the g-string called *abayen*. The upper covering is called *ulango*, made from the leaf of the wild buri palm. Sometimes a red kerchief called *limbutong* is worn over the *ulango*. The men wear g-strings with fringes in front.

The Alangan Mangyans practice *swidden* farming, which consists of eleven stages. Two of them are the firebreak-making (*agait*) and the fallowing (*agpagamas*). A firebreak is made so the fire will not go beyond the *swidden* site where the vegetation is thoroughly dry and ready for burning. Two years after clearing, cultivation of the *swidden* is normally ceased and the site is allowed to revert back to forest [Quiaoit, 1997].

Betel nut chewing is also noted among the Alangans, like all other Mangyan tribes. This they chew with great fervor from morning to night, saying that they don't feel hunger as long as they chew betel nut [Leykamm, 1979]. Nonetheless, betel chewing has a social dimension. Exchange of betel chew ingredients signifies social acceptance.

### Alangan

The Bangon Mangyans live along the Bongabon river called Binagaw and the surrounding mountains in the municipalities of Bongabong, Bansud, and Gloria in Oriental Mindoro.

The Bangon Mangyans have their own culture, language and writing system, different to the other tribes in Oriental Mindoro, and asserted they be considered the seventh major tribe – not a sub-tribe of the Tau-buid. In a March 28, 1996 meeting with Buhid Mangyans in Ogom Liguma, they decided to accept the word Bangon for their tribe.

© Mangyan Heritag

### Bangon

an Heritage Center

The Buhids are known as pot makers. Other Mangyan tribes, like the Alangan and Hanunuo, used to buy their cooking pots from the Buhids. The word Buhid literally means "mountain dwellers" [Postma, 1967].

Buhid women wear woven black and white brassieres called *linagmon* and a black and white skirt called *abol*. Unmarried women wear body ornaments such as a braided nito belt (*lufas*), blue thread earrings, beaded headband (*sangbaw*), beaded bracelet (*uksong*), and beaded long necklace (*siwayang* or *ugot*). The men wear g-strings. To enhance body beauty, the men wear ornaments like a long beaded necklace, tight choker (*ugot*) and beaded bracelet (*uksong*). Both sexes use an accessory bag called *bay-ong* for personal things like comb and knife [Litis, 1989].

Together with the Hanunuo, the Buhids in some areas possess a pre-Spanish syllabic writing system.

The Buhid Mangyans live in the municipalities of Roxas, Bansud, Bongabong and some parts of Mansalay in Oriental Mindoro, and in the municipalities of San Jose and Rizal in Occidental Mindoro.

### Buhid

To the Hanunuo, clothing (rutay) is one of the most important criteria in distinguishing the Mangyan from the non-mangyan (damuong). A Hanunuo-Mangyan male wears a loin cloth (ba-ag) and a shirt (balukas). A female wears an indigo-dyed short skirt (ramit) and a blouse (lambung). Many of the traditional style shirts and blouses are embroidered on the back with a design called pakudos, based on the cross shape.

Together with their northern neighbor the Buhids, the Hanunuo possesses a pre-Spanish writing system, considered to be of Indic origin, with characters expressing the open syllables of the language [Postma, 1981]. This syllabic writing system, called Surat Mangyan, is being taught in several Mangyan schools in Mansalay and Bulalacao.

## Hanunuo

The Tau-buhids are known as pipe smokers and even children begin smoking at a young age.

Standard dress for men and women is the loin cloth. In some areas close to the lowlands, women wrap a knee-length cloth around their bark bra-string and men wear cloth instead of bark. Bark cloth is worn by both men and women in the interior and is also used for head bands, women's breast covers, and blankets. Cloth is made by extracting, pounding and drying the inner bark of several trees [Pennoyer, 1979].

The Tau-buhid Mangyans live in the municipalities of Socorro, Pinamalayan and Gloria, but mostly are in Occidental Mindoro.

## Tau-buhid

The Tadyawan Mangyans live in the municipalities of Naujan, Victoria, Socorro, Pola, Gloria, Pinamalayan, and Bansud.

In the past, the women wore for their upper covering a red cloth called paypay, which is wound around the breast. For their lower covering, they wrapped around the waist a white cloth called talapi. The men wore g-strings called abay. For their accessories, women wore colorful bracelets and necklaces made of beads. Today, the women are rarely seen wearing their traditional attire, though some men still wear the abay.

Like all other Mangyan tribes, the Tadyawan depend on their "kaingin" farm for subsistence. Their staple foods are upland rice, banana, sweet potato, and taro. Some have also planted fruit-bearing trees like rambutan, citrus, and coffee in their kaingin.

## Tadyawan

The Iraya Mangyans live in the municipalities of Puerto Galera, San Teodoro and Baco in Oriental Mindoro but most are in Occidental Mindoro, particularly in the municipalities of Abra de Ilog, Paluan, Mamburao and Santa Cruz.

Estel (1952) described the Iraya as having curly or deep wavy hair and dark skin but not as dark as that of the Negrito.

During ancient times, the Iraya traditional attire was made of dry tree bark, pounded to make it flat and soft. The women usually wore a blouse and a skirt and the men wore g-strings made of cloth. Today, however, the Iraya are dressed just like the lowland people. Ready-to-wear clothes are easier to find than their traditional costume [Uyan, 2002].

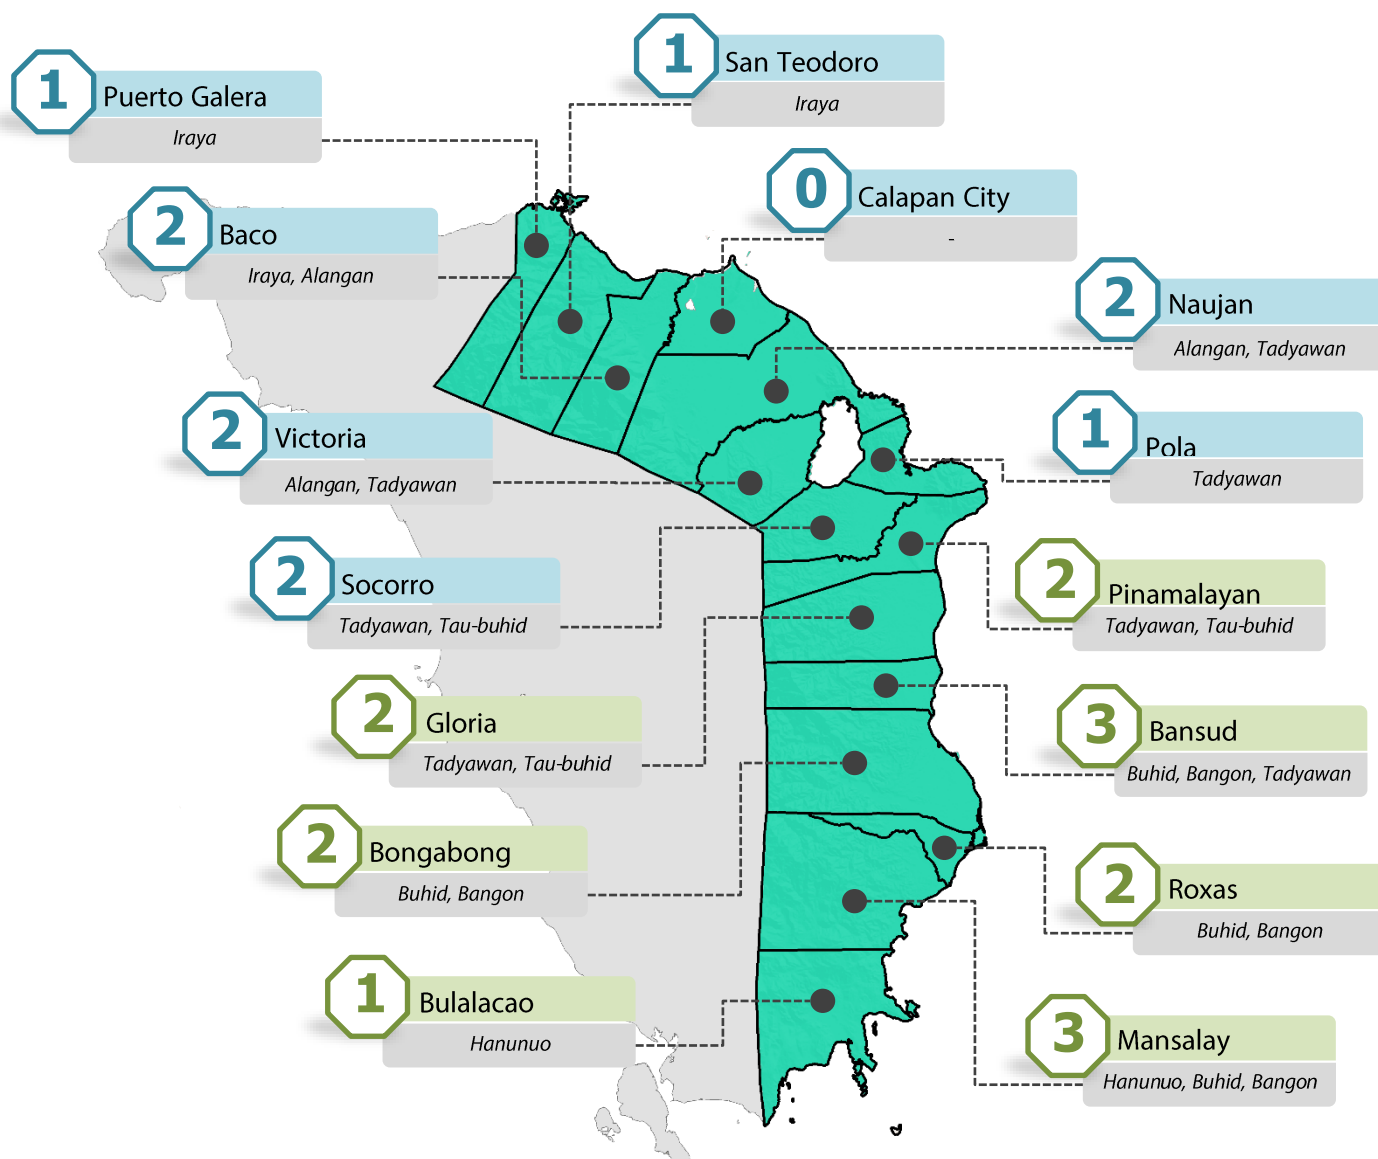

The Irayas are also skilled in nito-weaving. Handicrafts such as jars, trays, plates and cups of different sizes and design are being marketed to the lowlanders.

They subsist on rice, banana, sweet potato, and other root crops.

**IRRIGATION** is the method in which a controlled amount of water is supplied to plants at regular intervals for agriculture.

The term **RAINFED** agriculture is used to describe farming practices that rely on rainfall for water.

	Mt. Namalayan
	Colon Hill
	Lubok Sunken 17 <sup>th</sup> Century Sunken Church

# PANDANG GITAB

*The festival of lights*

every 3<sup>rd</sup> Saturday of February

Its name was coined from Pandanggo sa Ilaw (Fandango), a popular dance that originated from Oriental Mindoro and had its dancers balancing oil lamps called tinghoy or candles in glasses on their heads and on the back of each extended hand, and from Dagitab, a local word which means 'light.' The Pandanggo sa Ilaw was believed to have been inspired by the practice of sending off fishermen going out to sea in the wee hours of the morning by their families, who brought lamps to guide their way through the darkness.

## Festivities by City/ Municipality

Municipality	Foundation Day	Date of Fiesta	Festival	
			Name	Date
Baco	January 25	March 19	Banana	January 25
Bansud	July 4	January 17-19	Basudani	January 19
