About Provincial Product Accounts (PPA)

The Philippine Statistics Authority (PSA), as stipulated under Republic Act 10625, is the agency tasked to promote and develop integrated social and economic statistics and coordinate plans for the integration of those statistics, including the national accounts. Further, the PSA is the agency tasked with the responsibility of developing compilation methodologies using various data to support the national accounting framework, or the System of National Accounts (SNA). This framework presents a comprehensive picture of the economy as well as the different factors that are relevant to the economic situation in order to assess the developments and formulate policy measures that are needed to bring the entire economy to a desired goal. The SNA framework serves as basis to measure the economic performance of the country. This has also a vital role in coordinating statistics among stakeholders.

The PSA through the Macroeconomic Accounts Service (MAS) regularly release the quarterly National Accounts of the Philippines (NAP). Moreover, the PSA is also mandated to release annual regional accounts, namely: Gross Regional Domestic Product and Gross Regional Domestic Expenditure. However, data at the national and regional level are not enough. It is recognized that in order to understand the performance of the economy better, the data should be characterized further at the subregional level. This will ensure a more effective planning as well as policy and decision towards economic and social development. The popular use of the SNA by government planners at the national and regional levels as well as by decision-makers and researchers from private sectors has encouraged compilers of national accounts to come up with estimates at the provincial level in support of decentralized planning and decision-making. As such, the demand of having subnational level estimates for the NAP has increased.

In response to this, the PSA, spearheaded by MAS and in collaboration with the Regional Statistical Services Offices (RSSOs) and Provincial Statistical Offices (PSOs), has undertaken the pilot compilation of the Provincial Product Accounts (PPA). This serves as a major milestone not only by the PSA but also the entire Philippine Statistical System (PSS) addressing the overarching demands of subregional accounts.

The PPA is a mechanism to compile the GDP at the subregional level. Complementing the GDP at the national and regional level, PPA is viewed as a means to measure the economic performance at the provincial level and to monitor economic development or progress. Further, the compilation of PPA will help strengthen the planning and decision-making of provincial policymakers and stakeholders in crafting more informed economic policies. Using the SNA framework, the PPA serves as an opportunity not only to provide macroeconomic statistics level but also to strengthen statistics to address data gaps at the subregional level. Using the production approach in GDP compilation, PPA covers 16 major industries classified according to the Philippine Standard Industrial Classification (PSIC).

In 2021, the PSA completed the first release of the PPA for 14 provinces and six highly urbanized cities (HUCs) from three pilot regions, namely: MIMAROPA Region, Central Visayas, and Northern Mindanao. The vision of the PSA is to institutionalize the compilation of PPA across all provinces and HUCs in the Philippines by 2025. The activities leading to the completion of the PPA of the pilot provinces and HUCs include among others the briefing and consultation with the stakeholders, training on standard classification systems, assessment and collection of data, capacity building on the SNA framework and compilation systems and methodologies. Equally important are the coordination mechanisms such as the Regional Statistical Committees (RSC) and Provincial Statistical Committees (PSCs) which brought together major stakeholders in the regions and provinces to address issues and challenges related to data as inputs to PPA.

List of Data Sources

Oriental Mindoro Ranks Second with the Largest Economy in MIMAROPA Region from 2018 to 2020

The Province of Oriental Mindoro was the second largest economy, following the Province of Palawan, among five provinces and one highly urbanized city in MIMAROPA Region. From 2018 to 2020, it accounted for an average share of 26.7 percent of the total economy of the region.

Among major industries, the economy of Oriental Mindoro is driven by Services, which accounted for more than half of the province's total economic output with an annual average share of 50.4 percent from 2018 to 2020. It was followed by Industry with 33.6 percent share, and Agriculture, forestry and fishing at 16.0 percent share.

Source: Philippine Statistics Authority

In terms of growth, the economy of Oriental Mindoro increased by 5.6 percent in 2019 from 98.61 billion pesos in 2018 to 104.10 billion pesos in 2019. However, the economy of the province plummeted by -9.0 percent to 94.74 billion pesos in 2020.

The main drivers of growth in the economy of the province in 2019 were: Manufacturing, which grew by 19.7 percent; Wholesale and retail trade; repair of motor vehicles and motorcycles, with 7.0 percent; and Financial and insurance activities, with

11.7 percent. On the other hand, the industries that contributed most to the decline of the province in 2020 were: Construction, which declined by -29.9 percent; Accommodation and food service activities, with -41.0 percent; Transportation and Storage, with -18.6 percent; and Agriculture, forestry and fishing, with -7.2 percent. Despite the declines in many industries in 2020, the following managed to grow during the period: Information and communication, with 10.5 percent; Public administration and defense, compulsory social activities, with 4.0 percent; Manufacturing, with 0.4 percent; Financial and insurance activities, with 0.9 percent; and Electricity, steam, water and waste management, with 1.4 percent.

Of the 5.6 percent economic growth of Oriental Mindoro in 2019, Services had the highest contribution with 2.8 percentage points. Industry contributed 2.4 percentage points while Agriculture, forestry and fishing contributed 0.4 percentage point. Meanwhile, of the -9.0 percent decline in 2020, Services contributed negative 4.3 percentage points, Industry contributed negative 3.5 percentage points, while Agriculture, forestry and fishing contributed negative 1.1 percentage points.

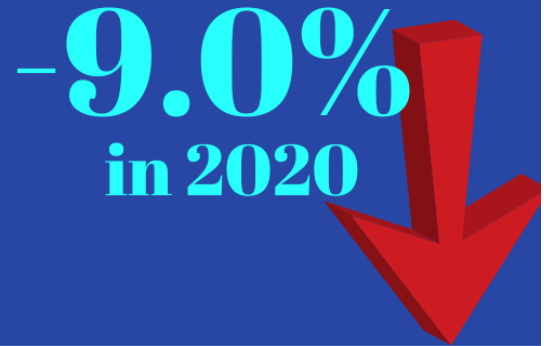

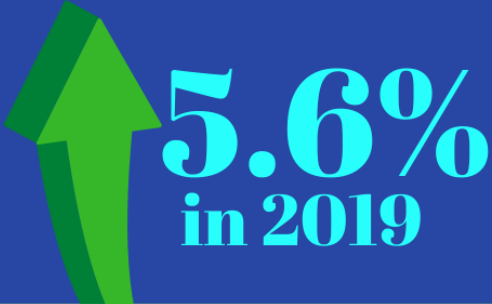

At the regional level, Oriental Mindoro is the highest contributor to the 4.3 percent growth rate of MIMAROPA in 2019. The province contributed 1.5 percentage points, which was followed by the Province of Palawan, with 1.3 percentage points. Meanwhile in 2020, Oriental Mindoro contributed about -2.4 percentage points of the -7.6 percent decline of the entire MIMAROPA Region followed by the Province of Palawan with -2.0 percentage points.
